

Fast Broadband Update

Finally, after many false starts and delays, BT Openreach have succeeded in bringing the high speed fibre optic cable into Kettlewell School and on the 28th August this installation was successfully completed and handed over to the service provider LN Communications who will now be able to start building the wireless network needed to broadcast it to the local community.

The next step is for LN Communications to build a test network focussing on Conistone, Kilnsey and Kettlewell. When this has been rigorously tested then the roll out of fast broadband can begin in those locations.

The planning applications for the masts to supply Starbotton, Buckden and beyond are out for consultation at present with another eleven days to run. Should there be no objections then the officers of YDNPA will be able to deal with the applications under delegated powers and we are hopeful that they will be processed soon after the consultation closes.

The planning applications for the three masts to supply Littondale are being worked up at present and will be submitted to the YDNPA shortly.

Nearly there!!

The Fast Broadband Team
