Herr Lerchner,

We are not happy – the British press has got news of our proposal for the Three Dales. Already the so-called "nimbys" are objecting. I have even had a call from a Mrs. Gladys Ingleton who is leading the protest.

It is essential that you get control of the situation immediately – if necessary, spend some money – we cannot allow the projekt to fail now, given the investment to date. Failure is not an option – I hope I make myself clear.

Herr Dr. Donauer,

I understand your concern, and will do what is necessary. However it appears the intelligence gathering capabilities of the local residents are more developed than we had recognised – there is a network of so-called "village shops" which are a front for a sophisticated information sharing operation. It may be necessary to mount a diversionary campaign such as the recent "Free Mars Bars on Fridays" operation – I assume funding for this would not be a problem

Lerchner,

You are a fool! Stop messing about – just buy the Mars Bars and get them to Wharfedale!

Donauer
